

# Hi, I am Andrés Lora

- Age: 22 years old
- From: Saravena, Arauca
- Interests:

I am passionate about digital content creation  
and now I am also exploring programming.  
I love learning new languages.

# Daily Routines

I go to the gym every morning, except on Sundays and holidays because it's closed.

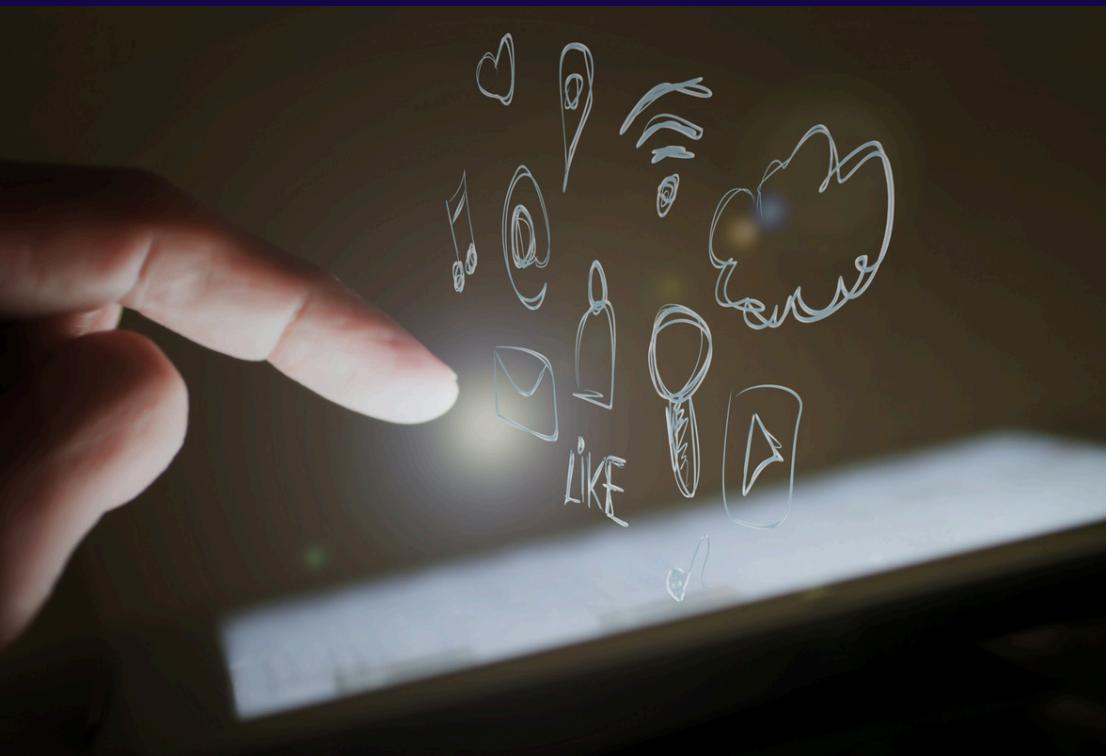

During my free time, I focus on programming projects and learning more about multimedia.

# My Hobbies

**Content creation:** I enjoy making multimedia content like videos and graphics.

**Programming:** Lately, I've been diving into coding and exploring new technologies.

A screenshot of a code editor showing a file named 'ProductConsumer.js'. The code is written in JSX (React.js). It includes a class definition with state and a render method. The render method contains a `React.Fragment`, a container div, a title, a row div, and a product consumer component. The consumer component is a function that takes a value and logs it to the console. The code is syntax-highlighted with colors for different elements like tags and strings.

# Learning Languages

I studied English for two years and obtained a B1 certificate. I am really interested in learning new languages, and I continuously work on improving my English skills.
